

# Data Analytics Services

*Helping our Clients realize  
their Vision*

Data integrity is the root of understanding your organization, whether it's patient, financial or employee related data. Data that is tainted or not quite right will de-value any results or reporting that is using it as an input. Our experienced staff know how to validate data and standardize terminology and data usage across the organization!

**Data Integration** – ensuring that data integrity is not compromised when moving from system to system:

- Integration Analysts
- Testing Management and SME's to help create plans or validate your results
- Education support to drive data value understanding and usage
- Cut-over and Go-Live planning and support

**Data Standardization** - creating a common format for the organizations data:

- Extraction and mapping of data for standardized use in
- Business Intelligence
- Disparate applications
- Management and technical support to define and implement standard data definitions

**Data Migration** – providing staff to assist with moving your data from one platform to another:

- One time conversion of system vendors or platforms
- Ongoing extraction, conversion and storage
- Management Services available (IT and Operational)

**Data Validation** – ensuring data quality:

- Prospective – defining what will be used in your new or existing system and ensuring cross system compatibility
- Concurrent- reviewing and validating current processes and real –time data input
- Retrospective- reviewing and validating data that exists in your current history
- Revalidation – post validation re-visit to ensure data input continues correctly

Clients enjoy the success that MedMatica fosters through our expert resources and our commitment to customer satisfaction. MedMatica's consultants are dedicated to only one Client - you! MedMatica further demonstrates our commitment to customer satisfaction by assigning **Care Managers** that ensure delivery of our Client-centric commitment to each Client.

**MedMatica**
