

MedMatica provides hands-on, end-to-end services focused on EMR and ERP solutions and other leading technologies. Our experienced consultants know healthcare operations, the technical attributes associated with applications, best practice project management methodology, design and build approaches, and process efficiency maximization. Let us help you transform your technology decisions to user driven data and patient care enablers.

Implementation - designing and building applications to your organizations needs:

- Program and Project Managers
- System Analysts
- Testing management and support
- End-user curriculum creation and training
- Cut-over and Go-Live planning and support
- Technology infrastructure support

Optimization - ensuring that your technology is enabling your business needs:

- Post Go-Live support
- Transition services focused on people/process/technology
- Transformation of workflows
- Alignment of staffing models and system usage

Support - providing temporary staff working with your team to assist with your short-term need:

- Staff augmentation
- Management (IT and operational)

Managed Services - owning specific operations and freeing up your team:

- Applications management and support
- Application Tier II and Tier III support
- Technical support

Legacy Support - supporting your legacy applications as you implement your new EMR or ERP solution or other leading technologies.

Clients enjoy the success that MedMatica fosters through our expert resources and our commitment to customer satisfaction. MedMatica's consultants are dedicated to only one Client - you! MedMatica further demonstrates our commitment to customer satisfaction by assigning **Care Managers** that ensure delivery of our Client-centric commitment to each Client.
